Aastra 6750 digital terminals

Combining design with reliability

Aastra capitalises on the success of its SIP phones design to extend its range of digital terminals.

Aastra 6750 series comprises 3 terminals with the same user-friendly ergonomics.

An extension module (M670) including 36 programmable keys with LED is available on the Aastra 6757 terminal.

Strong points of Aastra 6750

- **Aastra 6753, simplicity and elegance**

  Aastra 6753 has a screen for quick display of caller and called-party name. Moreover, the call by name function gives access to the IPBX directory.
  It comprises 6 programmable keys and 2 other keys for multi-line management, for instance. An LED indicates to the user that a message has been left via voice mail, or that a call was missed.

- **Aastra 6755, for heavy callers**

  Aastra 6755 has a large screen and 12 programmable keys, 6 of which have labels on the LCD screen.
  Its navigation key makes it easy to use. It is the ideal terminal for contact centres, because of its hands-free function and headset socket.

- **Aastra 6757, for the most demanding users**

  Aastra 6757 also has a large screen for displaying the labels of 20 programmable keys and 5 interactive keys.

  - Key labels on the LCD screen
  - Sleek design
  - Navigation key for terminals 6755 and 6757
  - Homogeneity with the Aastra 6750i SIP range
  - Compatibility with the installed base (as of release 3.2)
